# Dairy Plants Surveyed and Approved for USDA Grading Service

## PREFACE

The dairy plants listed in this publication are inspected periodically by the U.S. Department of Agriculture (USDA). USDA has two types of dairy plant approvals. Those operations denoted with "P" codes (packaging and processing) have only partial approval, and the resulting products may not be officially graded. (See pp. 28 - 29 for further details.) All other product codes--B, C, D, M, S, and W--denote products that are eligible for official grading service. Plant approval for grading service does not constitute an endorsement of product quality; however, such assurance could be achieved by official grading to meet a U.S. grade standard or a quality specification of the buyer or seller.

Plant approval is determined by unannounced inspections, conducted at least twice yearly and covering more than 100 items, including milk supply, plant facilities, condition of equipment, sanitary practices, and processing procedures. The inspection criteria are outlined in "General Specifications for Dairy Plants Approved for USDA Inspection and Grading Service" (7CFR 58.101 to 58.938) administered by the Dairy Division of USDA's Agricultural Marketing Service (AMS).

The USDA plant inspection program is widely used by the dairy industry. Plant managers recognize it as an important means for improving and maintaining a sound operation for producing dairy products that will meet specific grade or contract requirements and that have the uniform quality essential for buyer and consumer approval and protection. Buyers also find this program a reliable guide to sources for dependable dairy products.

The Dairy Grading Section of the AMS Dairy Division also provides service under its resident grading and quality control service. Plants using this service are shown in this publication with an asterisk. This full-time program offers on-the-spot official grading of the plant's manufactured products, laboratory testing and quality control, and plant inspection services. The resident program also makes available to the plant manager the technical know-how and experience of the Dairy Grading Section's supervisory staff for help in solving product quality problems.

Plant inspection services and the Resident Grading and Quality Control Program are available on a voluntary basis, and fees are charged to cover costs. Managers of dairy plants or other interested persons may obtain information about these services by contacting the nearest regional office of the Dairy Grading Section. (See directory of regional offices on p. 37.)

Plants listed in this publication are identified by State-assigned code numbers (where available) in accordance with the national uniform coding system known as FIPS (Federal Information Processing Standards). Each State has been assigned a two-digit number which appears in this publication before the name of the State. The State-assigned plant number identifying the plant precedes the plant name.

✓ This publication is revised every three months to reflect changes in plant approval and to include new plants.

USDA inspection and grading services are performed under the "Regulations Governing the Inspection and Grading Services of Manufactured or Processed Dairy Products," 7CFR 58.1 to 58.63.

Codes shown below denote products that are eligible for USDA grading or inspection service at USDA-approved dairy plants listed in this publication.

Codes shown below denote products that are eligible for USDA grading or inspection service at USDA-approved dairy plants listed in this publication.

\*Plants approved for codes marked with an asterisk are subscribing to the USDA Salmonella surveillance program, which monitors plant control by quarterly USDA sampling and testing of product and environmental samples, together with an established system of followup in the event of a positive result. While this USDA monitoring implies a certain degree of safety, the relatively low level of official testing does not ensure the absence of Salmonella organisms in products manufactured in USDA-approved operations.

#### Dry Milk Products-D

**SECTION II:**

**LISTING OF PLANTS WHICH HAVE PROCESSING  
OR PACKAGING OPERATIONS THAT  
MEET USDA REQUIREMENTS FOR  
FACILITIES AND SANITATION**

Codes shown below denote processing or packaging operations that meet USDA requirements for facilities and sanitation. Approval is limited to the designated kind of operation. Approval does not constitute eligibility for grading of finished products unless the bulk dairy products or dairy ingredients for packaging or processing are made by a USDA-approved plant. (See pp. 4 - 6 for codes indicating products eligible for USDA grading.)

If official inspection or grading service will be required on a "P" code product, contact the USDA Regional Director before the product is manufactured. Arrangements are needed for assurance that dairy ingredients were made by a USDA-approved plant.

\*Plants approved for codes marked with a single asterisk are subscribing to the USDA Salmonella surveillance program, which monitors plant control by quarterly USDA sampling and testing of environmental samples, together with an established system of followup in the event of a positive result. This Salmonella surveillance program is limited to the testing of only environmental samples because products manufactured by "P" code plants may be produced with dairy ingredients from unapproved sources. Plant management may request Salmonella analysis of a plant's "P" code production provided that such production is produced under continuous USDA inspection. While this USDA monitoring implies a certain degree of safety, the relatively low level of official testing does not ensure the absence of Salmonella organisms in products manufactured in USDA-approved operations.

\*\*Manufactured from vegetable oil. (Margarine made with animal fat ingredients is under the inspection of Meat and Poultry Inspection Operations, Food Safety and Inspection Service, USDA.)

### LABORATORY SERVICE

Within AMS, the Commodity Scientific Support Division bears the responsibility for performing or coordinating the performance of laboratory analyses. AMS laboratory testing service for dairy and related products is available, upon request, to any plant, industry, or private organization that wants its products analyzed.

Samples may be sent directly without prearrangement, but should be accompanied by a request listing the tests desired and the name and address of the firm or person to be billed for the service. Upon request, results will be telephoned collect as soon as analyses are completed. The request should specify the telephone number and person to contact.

To request laboratory services and a schedule of the fees associated with product testing, contact:

Dr. Fred H. Pepper, Acting Laboratory Director  
Western Commodities Support Laboratory  
Commodity Scientific Support Division
